Subject: **Request for Special Temporary Authority**

STA, to operate four (4) 800 MHz State allocated pairs within the City of
Columbia, Monroe County Illinois.

Region 13 800 MHz RCRIC has received an application for an STA to operate
four (4) 800 MHz State allocated pairs within the City of Columbia, Monroe
County Illinois, 12.5 KHz channels as part of the Starcom simulcast cell.

1. 851.8375 MHz
2. 852.3625 MHz
3. 852.8875 MHz
4. 853.9875 MHz

The proposed use of these requested frequency pairs are to add to the statewide
P25 trunked network known as StarCom 21. These channels are being added to the
existing Cell presently being used within the City of Columbia, Monroe County
Illinois to improve coverage for subscribers within that County Area. Being a state
wide Network the service to all Starcom Subscribers within the county will be
improved.

Region 13 supports the purposed STA Request from the Illinois State Police.

The Region reminds the applicant that the approval of the STA does not constitute
approval for formal permanent licensing of the selected STA channels. For formal
permanent licensing a formal request, which adheres to the Region Plan
Requirements must be submitted, for Region Review. Region approval must be
received by the applicant before a permanent license can be acquired.
